

# VENKATA NARAYANA REDDY

CSE (Data Science) Student

📍 Hyderabad, Telangana, India    📞 +91-9491243128    ✉️ nvnreddy9009@gmail.com

🐙 **GitHub:** github.com/Venkat9009    🌐 **Portfolio:** venkat-lime.vercel.app

## Summary

Computer Science and Engineering (Data Science) student with hands-on experience in Python, JavaScript, SQL, data structures and algorithms, React.js, FastAPI, and Supabase. Experienced in developing frontend applications, reusable software components, and database-driven systems through a remote software development internship and hackathon project. Strong interest in software engineering, problem solving, and building practical software solutions.

## Skills

**Programming:** Python, JavaScript, SQL

**Data Structures and Algorithms:** Arrays, Strings, Hashing, Linked Lists, Stacks, Queues, Trees, Graphs

**Frontend Development:** React.js, Next.js, HTML, CSS, Responsive Web Design

**Backend Development:** FastAPI

**Database:** Supabase, MySQL

**Developer Tools:** Git, GitHub, Postman, Visual Studio Code

## Experience

**Software Development Intern – Frontend**

**Feb 28, 2026 – Jun 14, 2026**

*Prompt 2 Prod AI – Remote*

*React.js, JavaScript, HTML, CSS*

- Completed a 15-day structured training program focused on React.js, JavaScript, component-based development, frontend architecture, and responsive web development.
- Developed responsive frontend applications using React.js, JavaScript, HTML, and CSS based on project requirements and user workflows.
- Built reusable React.js components and implemented interactive user interfaces to support application functionality and improve usability.
- Applied component-based development principles to organize frontend code and support maintainable application development.
- Used Git and GitHub for version control, code management, debugging, code reviews, and collaborative development in a remote work environment.
- Implemented frontend features and resolved development issues based on project requirements, testing, and feedback.

## Projects

**BloodLine – Hospital and Blood Center Coordination Platform**

**Hackathon Project, 2026**

*React.js, FastAPI, Supabase*

- Developed a healthcare coordination platform connecting hospitals and blood centers to improve communication and management of blood availability.
- Built responsive React.js interfaces enabling hospitals and blood centers to manage blood requirements, availability, and requests.
- Developed backend functionality using FastAPI for hospital requests, blood center information, authentication, and application workflows.
- Used Supabase for database storage and management of hospital, blood center, blood availability, and request information.
- Designed application workflows that enable hospitals to identify available blood resources and communicate requirements with connected blood centers.

## Education

**Bachelor of Technology (B.Tech) in Computer Science and Engineering (Data Science)**

**Expected**

**Graduation: 2028**

*Sri Indu College of Engineering and Technology*

*3rd Year*
